dis·till

/də'stɪl/

verb

1. purify (a liquid) by vaporizing it, then condensing it by cooling the vapor, and collecting the resulting liquid.

"they managed to distill a small quantity of water"

Similar:

purify

refine

filter

treat

process

sublime

sublimate

2. extract the essential meaning or most important aspects of.

"my travel notes were **distilled into** a book"

...students did not engage in consistent levels of attention but rather went between phases of attention and inattention throughout the entire lecture...

```
from dataclasses import dataclass
```

```
@dataclass
```

```
class Trade:
```

```
    symbol: str
```

```
    volume: int
```

```
    price: float
```

```
    buy: bool
```

```
from dataclasses import dataclass
```

*What's a
dataclass?*

```
@dataclass
```

*Is that a
decorator?*

```
class Trade:
```

```
    symbol: str
```

Is that valid syntax?

```
    volume: int
```

*There are types in
Python?*

```
    price: float
```

```
    buy: bool
```

Where's __init__?

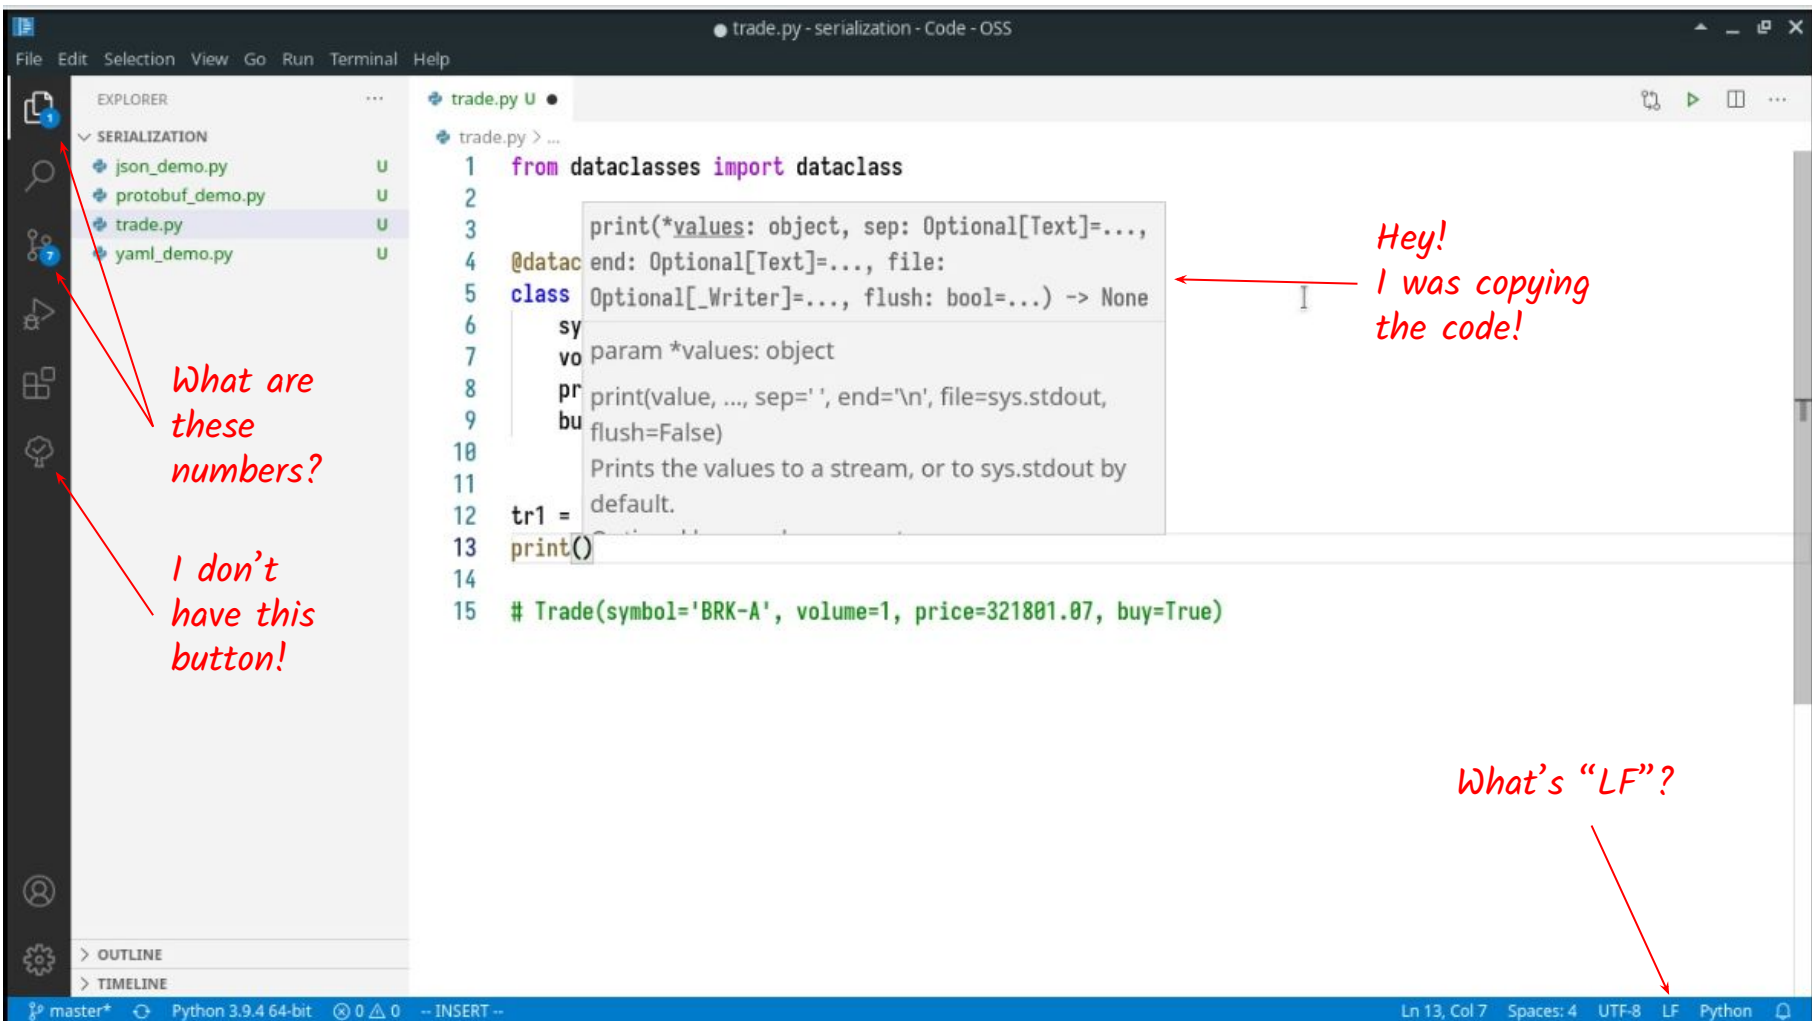

```
class Trade:
    def __init__(self, symbol, volume, price, buy):
        self.symbol = symbol
        self.volume = volume
        self.price = price
        self.buy = buy
```

```
class Quantity:  
    def __init__(self, value, unit):  
        self.value = value  
        self.unit = unit
```

```
height = Quantity(1.78, 'meter')
```

```
height = {  
    'value': 1.78,  
    'unit': 'meter',  
}
```

```
1 from dataclasses import dataclass
2
3
4 @dataclass
5 class Trade:
6     symbol: str
7     volume: int
8     price: float
9     buy: bool
10
11
12 tr1 = Trade('BRK-A', 1, 321801.07, True)
13 print(
14
15
16 # Trade(symbol='BRK-A', volume=1, price=321801.07, buy=True)
~
~
~
~
~
~
~
~
~
~
```

```
1 from dataclasses import dataclass
2
3
4 @dataclass
5 class Trade:
6     symbol: str
7     volume: int
8     price: float
9     buy: bool
10
11
12 tr1 = Trade('BRK-A', 1, 321801.07, True)
13 print(
14
15
16 # Trade(symbol='BRK-A', volume=1, price=321801.07, buy=True)
```

← What are these?

What's "All"?

trade.py [+]

13,7

All

-- INSERT --

← What's "INSERT"?

Thanks!
