SO YOU THINK YOU CAN

DANCE

print

Miki Tebeka

CEO, CTO, UFO ... 353solutions

```
=

print('WIIFM?')
```

Thanks!

```python
 1 class Player:
 2     # Number of players in the Game
 3     count = 0
 4
 5     def __init__(self, name):
 6         self.name = name
 7         self.count += 1
 8
 9
10 p1 = Player('Parzival')
11 print(Player.count)
```

What will this code print?

Miki Tebeka

```python
 1 from io import StringIO
 2 import pandas as pd
 3
 4 csv_data = '''\
 5 day,hits
 6 2020-01-01,400
 7 2020-02-02,800
 8 2020-02-03,600
 9 '''
10
11 df = pd.read_csv(StringIO(csv_data))
12 print(df['day'].dt.month.unique())
```

Will this code run? What will it print?
